SCIENCE LITERACY (K-12)

New Hampshire Project Learning Tree

March 1998

Revised September 2006

This handbook is a project of New Hampshire Project Learning Tree, a private non-profit organization committed to the environmental education of our youth. The handbook is dedicated to the hundreds of school teachers and administrators who are responding to the state's move to standards-based education. Yours is not an easy job; we hope this handbook helps to lighten the load.

We would like to hear from our readers about how you have used the handbook and whether you find it accurate and clear. You can reach NH Project Learning Tree at

54 Portsmouth St., Concord, NH 03301

Phone: 603-226-0160 or 800-677-1499.

Fax: 603-228-0423.

Email: info@nhplt.org.

Website: <http://www.nhplt.org>

Sincere appreciation to the principal author of the 1998 handbook, environmental education consultant Nancy E. Christie of Pittsfield.

Special thanks to the many teachers and education specialists who reviewed drafts of this document, both in 1998 and 2006. Your keen insights strengthened the final product immensely.

This correlation was funded by the United States Environmental Protection Agency, Office of Environmental Education under agreement number NT-83272501-0 between the U.S. EPA and the University of Wisconsin-Stevens Point.

The contents of this document do not necessarily reflect the views and policies of the United States Environmental Protection Agency or The Board of Regents of the University of Wisconsin System, nor does mention of trade names or commercial products constitute endorsement or recommendation for use.

Educators may photocopy these materials for the non-commercial purpose of educational advancement.

March 1998.

September 2006.

TABLE OF CONTENTS

Methodology – 2006 Correlation Revision (Science)	i
How to Use This Handbook	ii
Part 1: Correlation of Project Learning Tree Secondary Modules with NH Frameworks for Science Literacy (K-12)	
Exploring Environmental Issues: Focus on Forests	I-2
The Changing Forest: Forest Ecology	I-3
Exploring Environmental Issues: Municipal Solid Waste	I-8
Exploring Environmental Issues: Places We Live	I-12
Exploring Environmental Issues: Focus on Risk	I-16
Part 2: Correlation of NH Frameworks for Science Literacy (K-12) with Project Learning Tree Secondary Modules	
Earth Space Science	II-2
Life Science	II-4
Physical Science	II-7
Science Process Skills.....	II-8
Part 3: Chart of Correlations to NH Frameworks for Science Literacy (K-12)	
Earth Space Science	III-2
Life Science	III-4
Physical Science	III-6
Science Process Skills	III-8
NH Frameworks for Science Literacy (K-12) – Domains and Strands	III-11

METHODOLOGY

2006 Correlation Revision (Science)

NH's curriculum standards have undergone substantial change in response to the federal No Child Left Behind Act. The former state standards were written for the end of grades three, six and ten. To meet new formalized assessment requirements, the NH Frameworks for Science Literacy (K-12), approved in June 2006, address content and skills, and are divided into grade spans for K-2, 3-4, 5-6, 7-8, 9-11 (basic literacy) and 11-12 (advanced literacy).

The NH Frameworks for Science Literacy (K-12) contain the following components:

- **Domain**: There are four domains within the science curriculum frameworks: Earth Space Science (ESS), Life Science (LS), Physical Science (PS), and Science Process Skills (SPS).
- **Strand**: There are five strands, or enduring knowledge statements, in LS and four each in domains of PS and ESS. Strands are the SAME for each grade span although not all components may be seen in each grade span. (Example: LS1 – All living organisms have identifiable structures and characteristics that allow for survival (organisms, populations, & species.))
- **Stem**: These are the categories of ideas. Stems are common throughout all grade spans. (Example: 1. Classification)
- **Grade-span Expectations (Proficiencies)**: These are what all students should know and be able to do within a specific grade range. The ranges include: K-2, 3-4, 5-6, 7-8, 9-11 (basic literacy level) 11-12 (advanced level).

For each strand, the associated proficiencies were consulted to help inform the degree of correlation of the broader strand with each activity; a match of at least one proficiency was required to indicate a correlation. Three elements of each activity will help focus the correlation process.

- The subject identifier in the sidebar determined whether the activity was correlated to the science frameworks; if science is not listed the activity was not be addressed.
- The grade levels noted in the sidebar determined which grade span proficiencies were examined.
- The description of activity objectives in the sidebar informed which curriculum and proficiency standard(s) are related to the activity.

Note: Any attempt to correlate universal curriculum standards and a single curriculum program involves subjectivity. Two important steps were taken to limit bias. First, the author applied this rigorous methodology to determine correlation. Second, drafts were peer-reviewed by PLT-trained elementary, middle, and high school teachers. Reviewers most common finding was that PLT activities lend themselves to modification, and in so doing, would meet many more standards than indicated. NHPLT chose, however, to correlate based on a strict interpretation of the activities, as they are written.

HOW TO USE THIS HANDBOOK

The purpose of this handbook is to assist educators who are reviewing and revising their science curricula. The primary audience is classroom teachers, curriculum specialists, and curriculum committees. The handbook is divided into three sections, as follows

- **PART I lists each PLT activity in the *Secondary Modules* followed by the standards from the NH Frameworks for Science Literacy (K-12) with which it is aligned.**

Use Part I if you have a particular PLT activity in mind and want to know how it correlates with the state curriculum standards. Or, to find an appropriate activity to meet your needs, use PLT's "Topic Index" to select several potential activities to supplement your unit. To determine which state standards correlate with these activities, find the number and name of each activity in this handbook. Select an activity based on your objectives for your unit and the degree to which the activity correlates with appropriate standards. Each PLT activity is indicated by activity number and name and is followed by the strand and stem for each framework that is correlated to that activity.

- **PART II lists individual state curriculum standards from the NH Frameworks for Science Literacy (K-12), followed by the PLT activities that meet the individual standards.**

Use Part II if you have a particular curriculum standard in mind and want to find an activity that meets this standard. Then read about the activities in your PLT guide to determine the one most suitable for your particular situation.

All science domains (i.e. Life Science), strands (i.e. All living organisms have identifiable structures and characteristics that allow for survival (organisms, populations, & species) and stems (i.e. 1- Classification) are listed. Following each standard, the PLT activities aligned with that standard are identified by number and name.

- **Part III is a chart that lists each PLT activity in the *PreK-8 Activity Guide* and *Energy & Society Kit* and the standards from the NH Frameworks for Science Literacy (K-12) with which each activity is aligned.**

Note: Throughout this handbook, the domains are abbreviated as follows:

ESS – Earth Space Science
LS – Life Science
PS – Physical Science
SPS – Science Process Skills
